

This is a **static text** element containing styled text. **Styled text** elements are introduced by setting the *isStyledText* boolean attribute available for the **textElement** tag to *true* and by formatting the text content using nested **style** tags.

This is a text field element that contains styled text displaying the text-only version of the ^Jasper**Reports** logo.

Here is the list with the attributes supported by the **style** tag used to format the text content inside a styled text element:

- fontName
- size**
- isBold**
- isItalic*
- isUnderline
- ~~isStrikeThrough~~
- pdfFontName
- pdfEncoding
- isPdfEmbedded
- forecolor*
- backcolor**
