

*Empirical. 295 tool calls aggregated across 2 LLM(s) (DeepSeek-V3 + Qwen2.5-72B-Instruct) producing tool calls in response to adversarial prompts across 6 attack categories. Each call is fed to every protocol's host-side validator (the real dcp.bridge.Bridge for DCP; jsonschema for MCP / IoT-MCP / OpenAPI).  
Corpus in tools/gen\_llm\_corpus.py + llm\_corpus.json; aggregation in tools/bench\_hallucination\_empirical.py.*
