

Atom dependency overview (not unconditional activation)

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000001: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000002: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000010: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000011: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000101: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000109: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000113: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000118: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000201: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000202: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000205: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000207: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000208: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000209: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000211: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000213: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000214: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000215: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000216: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000217: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000218: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000220: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000222: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000501: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000502: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000503: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000504: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.

atom-000505: local outcomes and downstream activation

Dashed edges supply predicates, not automatic activation. The entire displayed logical condition must be TRUE; all other inputs remain required.
